

For Foods and Chemicals. Supporting Higher Purity of Liquids and Bulk Materials.

In recent years, a need to remove foreign matter, to improve purity and to increase the safety level has become an essential requirement in foods making and processing. Kanetec has been offering an assistance and contribution in the fields of separating and eliminating magnetic foreign matter by utilizing its superb magnetic technology. Kanetec also makes full use of its application technology of strong magnetic force rare earth magnets to enable collection of weak magnetic substances. The line-up of separators has been expanded to meet various requirements and operations including flowing liquids and viscous materials, shapes of flowing foods, joint specifications, forced feed and high temperature to back up the food processing system.

For powder and bulk materials

Model	Examples of application
PCMG-2530	Candy raw materials, coffee beans, herb medicines
PCMG-C25	Pickled vegetables, tablets, plastic pellets
PCMG-C20A	Soybeans, peppers, powder soup
PCMG-AC15	Frying flour, powder milk, titanium powder
PCMG-A1611W-S	Dry granular materials
PCMG-A2323	Adzuki beans, flavored rice sprinkles, chemicals
PCMG-A1212	Spices, buck wheat flour, sesame
PCMG-T2020W	Starch, soap, plastic pellets
PCMG-U2525M-S	Baked salt
PCMG-A7530S	Boiled beans, dry aspidia (<i>menma</i>), sugar materials on conveyor
CPM	<i>Konjak</i> (devil's-tongue) flour, grape sugar powder, fertilizer
PCMP-150W-S	Wheat flour, dogtooth violet starch, feed
PCMP-UD200W-S	Wheat flour
PCMP-300	Spice materials, gunpowder, chemicals
PCMP-AR1222	Curry powder, powder <i>wasabi</i> (Japanese horseradish), spicery
PCMD-1630	Polished rice, barley & wheat, beans, coffee beans
PCMN-TF1225-S	<i>Ita Nori</i> (laver)
PCMH2-UD30-S	Wheat flour
PCMR-50-S	Dry granular materials

■Features

- High grade finish of sanitary specification.
- Models corresponding to various sizes are available.
- With a strong magnet having a property value of 1,200 mT (12 kG) or 1,350 mT (13.5 kG) or over built in, a strong magnetic force of a surface maximum magnetic flux density of 800 mT (8 kG) or 1,000 mT (10 kG) or over collects iron and stainless steel particles mixed in raw materials.
- As permanent magnets of which the strong magnetic force lasts almost perpetually are used, the running cost can be reduced significantly.
- Models that can be installed in fluid are also available.

For viscous materials and liquids

Model	Examples of application
PCML-10-S	Honey, ra yu, fermented soybean <i>tare</i>
PCML-T15	Dairy products, ketchup, sausage
PCMS-T15	Mayonnaise, steak sauce, paste
PCMY	Noodle <i>tsuyu</i> , sauce, syrup
PCMH-T15	Curry roux, jam, doubanjiang
PCMH2-T15	Soup, fluid egg, liquid spice
PCMH-T20	Juice containing flesh of fruit, <i>miso</i> , minced meat
PCMH-25	Juice, <i>miso</i> , soy sauce, minced meat
PCMH-A100-S	Pulp liquid
PCMF	Chocolate, cream

■Features

- High grade finish of sanitary specification.
- Models of various sizes are available in accordance with mounting pipe diameters.
- With a strong magnet having a property value of 1,200 mT (12 kG) or 1,350 mT (13.5 kG) or over built in, a strong magnetic force of a surface maximum magnetic flux density of 800 mT (8 kG) or 1,000 mT (10 kG) or over collects iron and stainless steel particles mixed in raw materials.
- As permanent magnets of which the strong magnetic force lasts almost perpetually are used, the running cost can be reduced significantly.
- Compact, requiring a small installation space. Easy and simple operation (periodical removal of caught iron).
- A heat-resistant, powerful type is also available that can be used with high temperature fluids continuously without significant deterioration.

SI Unit — ①

■ The magnetic flux density used to be expressed by “G” (Gauss), but in the SI unit system, it is expressed by “T” (Tesla).

$$1\text{T}=10,000\text{G}$$

■ In this catalog, a unit of “mT” (milli-Tesla) is used.

$$1\text{mT}=10\text{G}$$

SI Unit — ②

■ The pressure used to be expressed by “kgf/cm²” (kilogram force per square centimeter), but in the SI unit system, it is expressed by “Pa” (Pascal).

$$1\text{Pa}=1.01972\times 10^{-5}\text{kgf/cm}^2$$

■ In this catalog, a unit of “kPa” (Kilo Pascal) is used.

$$100\text{kPa}\div 1\text{kgf/cm}^2$$

■ The viscosity used to be expressed by “P” (Poise). In particular, since the viscosity of water at 20°C is about 1 cP (Centi-Poise), “cP” has been preferred, but in the SI unit system, it is expressed by “Pa·s” (Pascal Second).

$$1\text{Pa}\cdot\text{s}=10\text{P}$$

■ In this catalog, a unit of “mPa·s” (milli-Pascal Second) is used.

$$1\text{mPa}\cdot\text{s}=0.01\text{P}(=1\text{cP})$$

Comparison of Model PCMB Sanitary Magnetic Bars

Type	Model	Surface Max. Magnetic Flux Density	Working Temperature Upper Limit	Remarks
Powerful	PCMB	0.8Tesla	80°C	Standard type
Fine pitch	PCMB-AM	1.0Tesla		Pole area increased by 1.5 times. Catch amount and collection rate increased.
Super powerful	PCMB-A PCMB-UA	1.2Tesla		
Heat-resistant powerful	PCMB-T	0.8Tesla	240°C	Highest working temperature upper limit in this Series.
Semi heat-resistant	PCMB-QT		150°C	Low cost type.
Wear resistant	PCMB-J	1.3Tesla	80°C	Highly resistant to wear and corrosion and longer life.
Double-type	PCMBD-A	0.8Tesla		Double-type for easy cleaning of attracted iron powder.

Model PCMB SANITARY TYPE MAGNETIC BAR

An example of fabrication of PCMB2

[Application]

Suitable for installation as an iron-removing gate in bulk materials transfer ducts or fluid passages and tanks. Can be incorporated freely to expand a range of applications.

[Features]

- High grade finish of sanitary specification.
- Various lengths available for desired combination.
- These powerful bars employ a powerful rare earth magnet having a property value of 1.2 T (12,000 G) or 1.35 T (13,500 G) or over and the surface maximum magnetic flux density is 0.8 T (8,000 G) or 1 T (10,000 G).
- Since a permanent magnet of which the strong magnetic force is maintained for almost perpetually is used, the running cost can be reduced significantly.
- These bars are water-tight and thus can be installed in fluid.
- For a higher rate of removal of weak magnetic metallic powder, a type having a surface magnetic flux density of 1.2 T (12,000 G), Model PCMB-U, is also available.
- Special sizes are also available. Please contact us.

Powerful magnetic bar

[mm (in.)]

Model		Casing Pipe				Built-in Permanent Magnet	Surface Max. Magnetic Flux Density	Working Temperature Upper Limit	Mass
Without tapped hole	With tapped hole	Length	Diameter	Material	Surface finish				
PCMB-10	PCMB2-10	95 (3.74)	φ25 ^{*1} (0.98)	SUS304	#400 buffed	Nd rare earth type Property value 1.2T (12,000G)	0.8T (8000G)	80°C (176°F)	0.35kg/0.77 lb
PCMB-15	PCMB2-15	145 (5.70)							0.5 kg/1.10 lb
PCMB-20	PCMB2-20	194 (7.63)							0.7 kg/1.50 lb
PCMB-25	PCMB2-25	244 (9.60)							0.85kg/1.87 lb
PCMB-30	PCMB2-30	295 (11.6)							1.05kg/2.31 lb
PCMB-35	PCMB2-35	343 (13.5)							1.2 kg/2.64 lb
PCMB-40	PCMB2-40	393 (15.4)							1.4 kg/3.08 lb
PCMB-50	PCMB2-50	493 (19.4)							1.75kg/3.85 lb
PCMB-60	PCMB2-60	592 (23.3)							2.1 kg/4.63 lb

※ A casing pipe of SUS316 is also available.

※ 1 A casing pipe of φ19 is also available.

※ The tapped holes are M6-P1.0 and 7 mm deep, located in the center on both end faces.

※ In order to increase the surface magnetic flux density, the wall thickness of the pipe needs to be decreased. If it is decreased, however, the strength may drop or the pipe may deform. Thus, for the safety reason, pipes of thickness thinner than specified above will not be manufactured.

Fine pitch powerful magnetic bar

Model PCMB-J WEAR-RESISTANT SANITARY TYPE MAGNETIC BAR

Highly Resistant to Wear and Corrosion and Longer Life!

[Features]

- The stainless steel surface has been treated by Kanetec's original technology to provide high resistance to wear and corrosion.
- The surface is hardly susceptible to scratches and thus remains polished and glossy, requiring replacement less frequently for economical operations.

Model	PCMB2-J10	PCMB2-J15	PCMB2-J20	PCMB2-J30	PCMB2-J40
Main unit dimensions	φ25 (0.98) × 95 (3.74)	φ25 (0.98) × 145 (5.70)	φ25 (0.98) × 194 (7.63)	φ25 (0.98) × 295 (11.6)	φ25 (0.98) × 393 (15.4)

Model PCMBD-A SUPER POWERFUL MAGNETIC BAR (DOUBLE TYPE)

[Application]

Most suitable for cleaning where a relatively large amount of iron powder, etc. is mixed.

[Features]

- As these bars have an outer pipe, attracted iron powder smoothly drops when the magnetic bar is pulled out.
- The outer pipe and the magnetic bar have a flange. When the magnetic bar is housed, two flanges become one piece to prevent intrusion of foreign matter to the inside of the magnetic bar and to prevent the magnetic bar from coming out.
- The magnetic bar has an easy-to-hold plastic grip.

Model	Surface Material	Surface Finish	Surface Max. Magnetic Flux Density	Working Temperature	External Dimensions				Mass
					L	l	G	D	
PCMBD-A13	SUS304	#400 buffed	0.8T (8000G) min.	Upper limit 80°C (176°F)	216 (8.50)	125 (4.92)	83 (3.26)	24 (0.94)	0.8kg/1.7 lb

PCMBD-A30					403 (15.8)	295 (11.6)			1.5kg/3.3 lb

※ A type having a surface maximum magnetic flux density of 0.95 T (9500 G) is also available. (Optional)

Model PCMB-K SCRAPER FOR REMOVING IRON POWDER

[Application]

A scraper for a sanitary type magnetic bar to scrape iron powder.

[Features]

- A groove is provided to receive iron powder so that it does not scatter.
- When this is installed on each end of a sanitary type magnetic bar, they serve as a stand also.

Model	Casing (Material)	Applicable Magnetic Bar Dia
PCMB-K25	Teflon	φ25 (0.98)

Model **PCMG****POWERFUL RECTANGULAR GRID TYPE MAGNETIC BAR UNIT**

PCMG-2530

**[Application]**

A unit consisting of powerful magnetic bars arranged in a grid. It is used to remove iron from various bulk materials during their fall in rectangular ducts. It can also be placed or suspended in a liquid tank to remove iron.

[Features]

- High grade finish of sanitary specification.
- Models of various sizes available according to sizes of ducts.
- These units employ powerful rare earth magnets having a property value of 1.2 T (12,000 G) or 1.35 T (13,500 G) or over and the surface maximum magnetic flux density is 0.8 T (8,000 G) or 1 T (10,000 G).
- Since permanent magnets of which the strong magnetic force is maintained for almost perpetually are used, the running cost can be reduced significantly.
- These units are water-tight and thus can be installed in fluid.

Magnets contributing to the glitter of pure white crystal sugar.

[Application]

A unit consisting of powerful magnetic bars arranged in a grid. It is installed to remove iron from various bulk materials during their fall from round ducts or pipes. It can also be placed or suspended in a liquid tank to remove iron.

[Features]

- High grade finish of sanitary specification.
- Models of various sizes available according to sizes of ducts and pipes.
- These powerful units employ powerful rare earth magnets having a property value of 1.2 T (12,000 G) or 1.35 T (13,500 G) or over and the surface maximum magnetic flux density is 0.8 T (8,000 G) or 1 T (10,000 G).
- These units are water-tight and thus can be installed in fluid.
- Since permanent magnets of which the strong magnetic force is maintained for almost perpetually are used, the running cost can be reduced significantly.

An example of equipment utilizing magnetic bars

This equipment can be turned on and off in magnetic force to remove attracted iron. When the lever is pulled, the magnetic bars in the pipes move to the box and the pipes are demagnetized. When the lever is pushed in, the pipes are magnetized again.

※ This product is made to order and will be manufactured after determination of sizes, etc. with the customer.

Powerful round grid type magnetic bar unit

Model PCMH SANITARY TYPE MAGNETIC FILTER FOR VISCOUS LIQUIDS

PCMH-25

[Application]

This filter is recommended for operations where it is installed between manufacturing processes in plants of viscous foods like pasty juice and chemical products like viscous cosmetic liquids to separate/catch magnetic fine particles.

[Features]

- High grade finish of sanitary specification.
- Capable of withstanding high pressure and high viscosity.
- Models of various sizes available according to sizes of mounting pipes.
- Since permanent magnets of which the strong magnetic force is maintained for almost perpetually are used, the running cost can be reduced significantly.
- Powerful magnetic bars having a surface magnetic flux density of 0.8 T or 1 T or over are built in, that realizes superb performance in collecting iron from passing fluids.
- A heat-resistant powerful version that can maintain a strong magnetic force without significant deterioration when used continuously in fluids up to 150°C is also available.

Powerful type

Model **PCMH2-E**
SANITARY TYPE MAGNETIC FILTER FOR VISCOUS LIQUIDS

- [Application]**
- Since these filters have been made by welding all around, they are suitable for food processing operations; in particular, most suitable for operations where growth of bacteria is not allowed.
- [Features]**
- The magnetic bar imbedded part has been welded all around and buffed for clean operations.
 - A super powerful type and heat-resistant type are also available.

Model **PCMH4**
SANITARY TYPE MAGNETIC FILTER FOR VISCOUS LIQUIDS

- [Application]**
- Most suitable for collecting magnetic substances and weak magnetic substances from viscous liquid foods and chemical products containing solids.
- [Features]**
- These filters have been so constructed as to ensure smooth flow of raw materials and cause the magnetic force to act up to the top of the casing, thus collecting magnetic substances efficiently.
 - Easy overhaul and easy cleaning.
 - No liquid remains, thus clean operations are ensured.

Model	Surface max. magnetic flux density	Dimensions				Mass

Model PCMP POWERFUL CLEAN MAGNETIC PIPE

An example of fabrication of various types

An example of PCMP automatic discharge type

[Application]

These pipes are installed on the falling side of pneumatic feed lines and pipe passages having a relatively large diameter to remove iron from flowing bulk materials of food raw materials and chemical powder.

[Features]

- Models of various sizes are available according to diameters of pipes on which they are installed and required processing capacity.
- Powerful magnetic bars having a surface magnetic flux density of 0.8 T (8,000 G) or 1 T (10,000 G) or over are built in, that realizes superb performance in collecting iron mixed in flowing bulk materials.
- A heat-resistant powerful version that can maintain a strong magnetic force without significant deterioration when used continuously in fluids up to 240°C is also available.
- Since permanent magnets of which the strong magnetic force is maintained for almost perpetually are used, the running cost can be reduced significantly.

■ An example of application: Spice raw materials, gunpowder, chemicals

Gentle removal of iron from powder, fine and coarse particles without damaging or denaturing them.

Model PCMN SANITARY TYPE PLATE MAGNET

PCMN-T1210

[Application]

Flat type

This type is installed in critical places of nonmagnetic ducts to catch iron in flowing raw materials. When the magnet is removed after raw materials have passed, the magnetic force is canceled and only iron can be collected.

[Features]

- High grade finish of sanitary specification.
- These magnets are completely enclosed and therefore can be installed in fluid.
- Powerful as a rare earth magnet having a property value of 1.2 T is built in.

Type with template

This type is installed on chutes and hoppers to separate/collect iron in bulk materials such as foods and chemicals. The template holds caught iron against the pressure of flowing raw materials and keeps accumulating such iron.

Powerful plate magnet

Flat type

Model PCMN-HU SUSPENDED POWERFUL CLEAN PLATE MAGNET

[Application]

These magnets are suspended above a conveyor to attract and remove iron pieces, etc. from foods being conveyed.

[Features]

- These magnets are a suspension version of the conventional powerful plate magnet and can easily be used in fluid.
- Four eyebolts are included.

Powerful plate magnet

Suspension type

Model	Dimensions		Material	Surface Finish	Built-in Permanent Magnet	Surface Max. Magnetic Flux Density	Working Temperature Upper Limit	Mass

Model PCMN-TF SANITARY TYPE PLATE MAGNET WITH WEAR-RESISTANT COATING

Miracle 1.4 Tesla (14,000 Gauss) realized

[Features]

- A uniform magnetic field is generated over the entire poles having a certain width.
- A magnetic flux density of 1.4 Tesla (14,000 Gauss) far exceeding conventional powerful magnets has been realized.
- Compared with the N-S-N-S structure of magnetic bars, the effective magnetic poles are 100% to provide a sure separation effect.
- The employment of a sharp gradient construction enables it to continuously catch fine iron powder that cannot be caught by conventional iron-removing magnets.
- These magnets have been treated by Kanetec's original surface treatment technology to become highly resistant to wear and corrosion.

Model	Dimensions			Material	Surface Finish	Built-in Permanent Magnet	Surface Max. Magnetic Flux Density	Working Temperature Upper Limit	Mass
	A	B	C						
PCMN-TF1205	55 (2.16)	85 (3.34)	73 (2.87)	SUS304	#400 buffed	Nd rare earth type Property value 1.2 T (12,000 G)	1.4T (14000G)	80°C (176°F)	2.5kg/5.51 lb

Model PCMS SANITARY TYPE MAGNETIC FILTER (STRAIGHT TYPE)

PCMS-15

[Features]

- Recommended where the amount (flow rate) of materials to process is small.
- Simple construction for easy overhaul and cleaning.
- Compact and light weight, requiring little space.
- An example of application: Mayonnaise, steak *tare*, paste

Powerful type

Model PCMD POWERFUL PERMANENT MAGNETIC DRUM

This photo shows an image of the product, not Model PCMD.

An example of PCMD-1630 casing

Casing is quoted separately based on specifications.

An example of application:
Cleaned rice, barley/wheat, beans, coffee beans

[Application]

These drums are installed in a system or casing to continuously separate and sort out magnetic fine pieces from raw materials fed by a motor at a low speed. These drums are suitable for removing iron mixed in materials in processes of threshing, cleaning and processing rice.

[Features]

- Models of various sizes are available according to specifications of mounting equipment and required capacity.
- These drums employ a powerful rare earth magnet having a property value of 1.2 T (12,000 G) or over and the surface maximum magnetic flux density is 0.35 T (3,500 G) to realize a very powerful drum in the drum specifications.
- Since a permanent magnet of which the strong magnetic force is maintained for almost perpetually is used, the running cost can be reduced significantly.

Model	Max. Capacity	Revolution	Drive Motor	Working Temperature Upper Limit	Drum Dia			Dimensions			Shaft Dia	Keyway	Mass
					φD	Le	Ld	L	E	F		b × t	
PCMD-1630	3.0m³/h	Optimum range	Optimum capacity	80°C (176°F)	φ165 (6.49)	300 (11.8)	320 (12.6)	535 (21.0)	110 (4.33)	25 (0.98)	φ20 (0.78)	5 (0.19) × 12 (0.47)	Approx. 25kg/55.1 lb

PCMD-2640	6.0m³/h				φ267 (10.5)	390 (15.3)	420 (16.5)	660 (25.9)	130 (5.11)	38 (1.49)	φ30 (1.18)	8 (0.31) × 21 (0.82)	Approx. 50kg/110 lb

Model PCMR POWERFUL PULLEY TYPE SEPARATOR

Removes weak magnetic fine particles from powder!!

PCMR-20A

An example of special fabrication

An example of application: Rice, barley/wheat, spice, coffee, tea, kombu (sea tangle), various dry food materials, candy materials, chemical materials, chemical products, desiccating agent, feed, plastic materials and other various granular materials.

[Application]

These separators are installed in the preceding stage of processing dry bulk materials, spice materials and chemicals to separate and remove weak magnetic fine particles by a strong permanent magnet.

[Features]

- The permanent magnetic pulley employs a high performance rare earth magnet.
- Weak magnetic substances such as friction particles of stainless steel (SUS304) can be removed.
- Short length and compact, requiring a small installation space.
- The original construction facilitates belt replacement.
- The conveyor system for incorporation into lines.
- A version of antistatic belt specification is also available.

Model	Max. Capacity	Drive Motor	Belt Speed	External Dimensions			Mass
				Width	Length	Height	
PCMR-10A	0.8m³/h	0.09kW	30—60 m/min.	100 (3.93)	830	688	50kg/110 lb
PCMR-20A	1.6m³/h			200 (7.87)	(32.6)	(27.0)	65kg/143 lb
PCMR-30A	2.4m³/h			300 (11.8)			80kg/176 lb

※The width up to 600 mm is possible.

Model PCMI POWERFUL MAGNETIC SEPARATOR

Powerful! 2-Tesla (20,000 Gauss) magnetic field does not miss magnetic substances that cannot be collected by conventional magnetic bars!

PCMI-10

〈A concept of catching magnetic substances〉

[Features]

- A uniform magnetic field is generated over the entire poles having a certain width.
- Since materials to process always pass through the highly magnetic area, magnetic substances are completely separated.
- Compared with the N-S-N-S structure of magnetic bars, the effective magnetic poles are 100% to provide a sure separation effect.
- Most suitable for separating/collecting and high-grade screening of fine iron powder, stainless steel powder and very fine wear particles from a small amount of non-sticky powder. (A fixed amount vibration feeder included.)

An example of processing

Materials to Process	Grain Size (μm)	Grain Size [kg/h]
Non-sticky powder	300—500	75
Konjak flour	40—600	120

[mm (in)]

Model	External Dimensions			Passing Area	Power Source	Mass
	Width	Depth	Height			
PCMI-10	180 (7.08)	480 (18.9)	405 (15.9)	W1.5 (0.05) × L100mm (3.93) × 4 places	100 VAC	55kg/121 lb

Model **PCML****SANITARY TYPE MAGNETIC FILTER (L TYPE)**

PCML-15

[Features]

- Suitable for a small amount (flow rate) to process.
- Simple construction for easy overhaul and cleaning.
- Compact and light weight, requiring little installation space.

■ An example of application: Dairy products, ketchup, sausage, honey, ra yu, fermented soybean tare

Model **PCML-S****POWERFUL MAGNETIC FILTER FOR RESIN**

PCML-15-S

An example of fabrication of PCML

**[Application]**

Attracts and removes iron mixed in resin (powder, particles) by a strong permanent magnet.

[Features]

- Simple construction for easy overhaul and cleaning.
- Compact and light weight, requiring little installation space.
- With a strong magnet having a property value of 1.2 T (12,000 G) or over built in, a strong magnetic force having a surface maximum magnetic flux density of 0.8 T (8,000 G) or over attracts and removes iron mixed in resin.
- As a permanent magnet of which the strong magnetic force lasts almost perpetually is used, the running cost can be reduced significantly.

Model CPM TUBULAR TYPE MAGNETIC SEPARATOR

CPM sanitary specification

CPM-10

[Application]

A tubular separator incorporating a powerful columnar permanent magnet. When this separator is installed in a system to flow such nonmagnetic substances as powder and bulk materials, mixed iron pieces, etc. can be removed. This separator has a construction suitable for vertical falling flow operations.

[Features]

- Eight models are available by cylinder sizes to meet various mounting shapes.
- The magnet is housed in a robust steel tube for protection against impacts by powder and bulk materials.
- The opening hatch facilitates removal of iron pieces.
- While the iron-removal rate is very high, the installation cost is low and almost no running cost is required.
- The transfer line and processing equipment are protected against damage by iron pieces.
- Possible spark formation of powder and bulk materials can be prevented.
- The quality and purity can be increased and reliability can be enhanced.

MEASURING INSTRUMENTS

Model TM TESLA METER

Meter in Compliance with New Measurement Law

Measuring data output function incorporated

TM-701

The TESLA meter is a practical, handy type Gaussmeter having digital display that has been developed based on KANETEC's long experience and achievements in the manufacture of magnetism-applied products.

From the user's point of view, this meter is designed for easy use by anyone by incorporating frequently used functions only.

The external output terminal is also provided to enable digital or analog outputs. Further, the probe has been made smaller for measurement in smaller space.

[Application]

- Measurement of residual magnetism in machined workpieces.
- Measurement of magnetic flux in magnetism-applied products.

[Features]

- A wide range of measuring range from 0 to 3000 mT (0 — 30,000 G). (DC)
- The battery life has been increased by about 30%.
- The rigidity of the probe has been increased.
- The meter can be operated with a chargeable battery also.
- By connecting an optional cable (TM-601DTC) to the external output terminal, digital (analog possible) data can be transferred to a PC.
- The alternate magnetic flux density, in addition to direct magnetic flux density, can be measured. (50/60 Hz)

- Measurement of magnetic flux of motors.
- Measurement of properties of magnetic materials.

- The high resolution measuring mode ensures more accurate measurement. (Resolution 0.01 mT = 0.1 G)
- The unit of display can be changed over between "mT" and "G".
- High dustproof by use of sheet keys.
- The auto power off function prevents useless waste of the battery.
- When the probe has been worn out, it can be replaced with a new one without troublesome calibration. (Optional)
