

SPOTAIR®

Movable industrial air conditioner

SAC-80 B

All the compressors use Japan brand

The characteristics

This product uses advanced and efficient fin type of clear water membrane cooling and inner thread copper pipe, imported high efficient rotary compressors, low noise fan and touch-snapped switches. The operation is simple and reliable. This product not only has the function of cooling, dehumidification, but also has the function of sending fresh wind. This equipment is convenient and simple to install and applicable not only in the movable temporary housings, but also in the workshop equipments, mini-trpe of production line, elevator operating rooms and special work position and environments such as factories.

- This equipment can be placed indoors or outdoors and give out fresh wind
- Three cold air vents
- High power

Applications

- Spot temperature control in the field of machinery injection, hardware and elevator operating rooms
- Used in warehouses, workshops and building industry
- Used in outdoor construction
- Used in tents and exhibition site
- Used in animal-breeding industry

Specifications

Model	SAC-80 B	
Power source	Three-phase 380V/50Hz	
Cooling volume	8000W (27000BTU)	
Input current	Blast	Cooling
	0.44A	6.2A
Consume power	0.25kw	3.5kw
Cold output	1200m ³ /h	
Coolant	R22	
Outside dimensions	W900×D700×H1000	
Weight	124kg
